The Company

Nampak Tissue Away from Home is a leading supplier of hygiene products and services for hospitality, health care and food industry applications. Their hand hygiene product range includes advances in equipment and consumables that provide best practice benefits for operators seeking improved hand hygiene performance .

The Products

The following products are endorsed by Handwashingforlife®:

▶ Soap & Sanitiser:

- **0530 Elite Dispenser:** A reliable, sealed system dispenser which eliminates the risk of cross contamination and tampering. Its user friendly design facilitates the use of both soap and sanitizer and can be customized to indicate the contents. Two different coloured handles encourages the use of both soap and sanitizer, promoting good hygiene practice.
- **G-Cide Foam Soap:** Good lather, clean rinsing, mild on hands; ideal for frequent use environments.
- **G-Cide Foam Sanitiser:** Excellent “low alcohol” efficacy, low volatility, biodegradable & gentle on hands for frequent use locations.

▶ Paper towel:

- **6905 Elite Automatic Dispenser:** Sensor operated “No Touch” dispenser. No Hands dispensing is the gold standard in safety. Lowers risk of cross contamination and increases frequency of washing.
- **Tidy Control 2 ply towel:** Good wet strength and absorbency for pathogen removal (paper towels do more than just dry hands; they are an active part of the germ removal process).
